

Risk Messenger™

Automated Messaging for Safer Travel.

Cornerstone Risk Messenger™ is an automated communication tool that can be used to alert and educate travelers regarding risk levels during their trips and according to destinations. Travelers receive communications from you regarding health policy and destination risk updates.

Travel is Hard. COVID Made it Harder.

You need more now from your messaging applications than ever before:

Personalized Traveler Communication based on destination risk levels and safety guidelines

Local restrictions and entry requirements for each destination

Choose the configuration, frequency, and timing of your communications

Automated Workflow that fits your current practices

Just What They Need. Right When They Need It.

Up to date, trip specific information delivered to your travelers in short memorable bursts at key touchpoints of their trips that have been tailored to your policy and culture.

The world is changing faster than ever. **Risk Messenger** will keep you in step with it the whole trip.
